Reticle Storage Solution

Racks on Rails

TexTech, LLC

**Reticle storage racks that move on rails at the press of a button.
The most cost effective reticle storage solution available**

**No need for access aisles between every rack of reticles.
Automated motorized reticle racks move to create an access aisle.
Vastly increases the number of reticles that can be stored in your FAB.**

Use the optional Reticle Manager for check-ins and check-outs by Bar Code or Keyboard.

The Reticle Manager's database tracks reticle usage rate, location, maintenance, and history of operator interactions.

Ergonomic Height

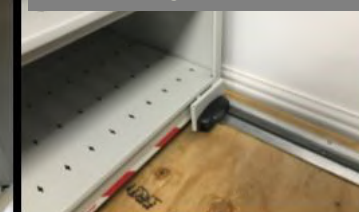

- **Systems are configurable to fit into the available space**
- **Users can add storage capacity at a later date as needed**
- **Racks are built custom to fit the box types and sizes**
- **Reticles can be oriented vertically or horizontally**
- **Safety sensors, anti-tip, low profile rails, and other safety**
- **Visit our Dallas, TX area showroom to see a demo unit**
